

# Governments do not care about workers!

## Time for the spring offensive!

Arizona's winter is far from over. On the contrary, **the measures pushed through by the government are chilling:**

- working longer for a **smaller pension**;
- imposing **unwanted flexibility** and increasingly precarious statutes and uncertain working hours, annualization of working time;
- frozen wages, cut bonuses, attacks on **indexation**;
- targeting **long-term sick workers**;
- **VAT increase**;
- **draining public services**: shortages of social housing and prison guards, disappearance of swimming pools and public transport, etc.

In short: pensions are absolutely not secured for future generations; purchasing power is shrinking while the government generously hands out wage subsidies.

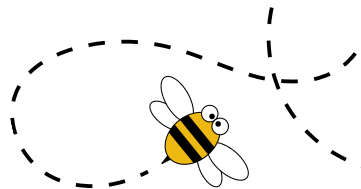

# THIS HAS TO CHANGE!

National demonstration in  
Brussels on 12 March

# This has to change!

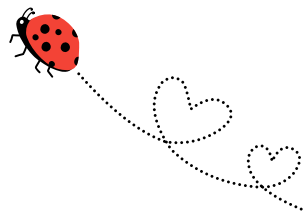

Faced with this cold reality, we want a warm society where everyone can grow and thrive. The continued actions of the last few months have visibly paid off. Together, we have succeeded in:

- ✓ maintaining **end-of-career employment schemes**;
- ✓ including **periods of temporary unemployment and sickness in pension calculations**; after all, no one chooses to lose their job or fall ill;
- ✓ keeping the **first year of work** in pension calculations.

## Join us

in Brussels on Thursday 12 March!

## Alternatives exist:

- ✓ fair and serious **taxation on wealth**;
- ✓ a **tax on the digital activities** of tech giants;
- ✓ a **strict and transparent audit of the billions in corporate subsidies**;
- ✓ **every salary must contribute** to social security, whether or not it comes from a management company.

# Workers deserve respect.
