

Workers have already contributed enough!

We are continuing our spring offensive!

The Arizona government keeps adding to its list of socially destructive measures. While the world burns, prices rise and uncertainty increases, the government chooses to:

- ✘ attack the **automatic indexation** of wages
- ✘ **reform pensions**, which will impoverish workers, particularly women and part-time workers

Even though our collective protest has already paid off, the government continues to pass the buck to the workers who keep our country running.

High time the government looked at the revenue side!

- ✔ What about **wage subsidies** for companies?
- ✔ When will the **broadest shoulders** pay their fair share?

THIS HAS TO CHANGE!

Hit the streets with us
on Tuesday 12 May in Brussels.
