

The sectoral negotiations for the metal trade are at a standstill, but **ACV-CSC METEA continues to push for a sectoral agreement for all workers.**

Our main demand: maximum increase in purchasing power for all workers by increasing meal vouchers by €2.

This increase in purchasing power means only 1% of the profits made within the entire sector in recent years. However, your employer is not giving out a mandate to agree to this at sector level.

We want improvements in pay and working conditions for the sector.

As a trade union, we support a good social dialogue between employers and trade unions at company level, but for us, the basis is and remains a clear sectoral agreement.

Support this call and sign our petition for a sectoral agreement with:

- **Maximum purchasing power**
- **Training for every worker** to prepare them for future challenges
- A **full debate** on workable work and career wind-down
